## SUMMARY

I am a Full-Stack Developer focused on creating expandable, high-performance, and AI-ready digital products, combining solid engineering fundamentals with product vision and real business impact.

## EXPERIENCE

**Full-Stack Software Developer (Trainee)** 04/2025 - Present

SysMap Solutions (Client: Fully Ecosystem - Healthtech) • São Paulo, Brazil (Remote)

- Working on a large-scale health platform (R\$ 200 million investment from Prudential), serving over 50 thousand active users in 3 languages.
- Raised the app's public rating from 2.8 to 4.3 on iOS and 2.5 to 4.9 on Android through continuous technical improvements and user experience focus.
- Actively contributed to full-stack feature development in production environments, using NestJS, Node.js, Kotlin, React, Docker, and AWS (Lambda, S3), ensuring scalability and security.
- Implemented high-value modules, such as the user's digital wallet, currency transactions, and mental, physical, and financial health modules.
- Developed automations with AWS Lambda for generating operational and analytical reports, supporting business decision-making.
- Created and documented an automated testing standard (Jest/Unit Testing), adopted internally as the main guide for test implementation.
- Participated in technical and architectural decisions within remote agile squads, collaborating with Product, Design, and Business teams.

**Tech Lead & Full-Stack Developer (Freelance)** 06/2024 - 04/2025

- Led the delivery of digital projects for clients in the innovation and luxury hospitality sectors, acting as a technical lead and full-stack developer.
- Led the development of new features for engagement and scalability for a Hackathon and Open Innovation Platform.
- Delivered a premium, multilingual (PT/EN/ES), responsive, and SEO-optimized website for Esphera Glamping.

**Front-End Development Intern** 01/2024 - 06/2024

Elastic Code • Remote

- Acted as the main front-end responsible in a multidisciplinary team, contributing to projects across various segments (logistics, AI, retail).
- Responsible for the front-end architecture and implementation of a Freight and Truck Fleet Management System using React, TypeScript, Tailwind CSS, NextUI, and Styled Components.
- Developed front-end components for an AI File Analysis Platform integrated with AWS, utilizing LLM technologies.
